

PGI COVID Policy – Fargo 2021

- *We will comply with and conform to any local and state regulations, as well as any CDC policies and guidelines in effect. Should there be a discrepancy between state, local and national guidelines, we will adhere to the local guidelines as they will be the most germane to our venue location.*
- *Each member may do as (s)he wishes in his/her own space. However, if you enter someone else's space, it becomes their right to insist upon terms, such as wearing a properly fitting mask if you approach within six feet of another person.*
- *If there is a conflict between the PPE required for a pyro activity (such as in Manufacturing or in shooting), and the PPE to prevent Covid-19 transmission, we are going to defer to pyro protective PPE and ask that persons uncomfortable with being in such areas refrain from entering those areas. For example, vented N-95 masks do not prevent Covid-19 transmission but may be necessary when working with metal powders in hot and humid environments.*

From *the Board of Directors*
